Adding a 2-digit number and a 1-digit number (with carrying)

Grade 3 Addition Worksheet

Date:_____

Name:_____

LET'S MAKE ADDITION OF NUMBERS FUN

What is the sum of the following numbers.

1. $28 + 4 =$

2. $35 + 6 =$

3. $71 + 9 =$

4. $77 + 5 =$

5. $82 + 8 =$

6. $52 + 8 =$

7. $19 + 3 =$

8. $26 + 6 =$

9. $38 + 9 =$

10. $47 + 4 =$

11. $31 + 9 =$

12. $53 + 7 =$

13. $62 + 8 =$

14. $85 + 8 =$

15. $47 + 8 =$

16. $14 + 7 =$

17. $22 + 8 =$

18. $13 + 9 =$

19. $39 + 3 =$

20. $57 + 4 =$

Adding a 2-digit number and a 1-digit number (with carrying)

1.	$28 + 4 =$ **32**	11.	$31 + 9 =$ **40**
2.	$35 + 6 =$ **41**	12.	$53 + 7 =$ **60**
3.	$71 + 9 =$ **80**	13.	$62 + 8 =$ **70**
4.	$77 + 5 =$ **82**	14.	$85 + 8 =$ **93**
5.	$82 + 8 =$ **90**	15.	$47 + 8 =$ **55**
6.	$52 + 8 =$ **60**	16.	$14 + 7 =$ **21**
7.	$19 + 3 =$ **22**	17.	$22 + 8 =$ **30**
8.	$26 + 6 =$ **32**	18.	$13 + 9 =$ **22**
9.	$38 + 9 =$ **47**	19.	$39 + 3 =$ **42**
10.	$47 + 4 =$ **51**	20.	$57 + 4 =$ **61**

Answer Explanation: Remember that;

Regrouping (or carrying) in addition means, if I add two numbers and end up with a 2-digit number, then I have to put the digits in the right place value.

For example: What is the sum $\quad 47 + 4 =$ ☐

Add the ones	Regroup (or carry)	Add the tens
	1	1
4 7	4 7	4 7
+ 4 ∷	+ 4	+ 4
11	1	5 1

Therefore, $\quad 47 + 4 =$ **51**
