

Division of Integers

Grade 7 Division of Integers Worksheet

Date: _____

Name: _____

LET'S MAKE DIVISION OF INTEGERS EASY

Divide the following integers

1. $-18 \div 3 =$

2. $-81 \div 9 =$

3. $20 \div -5 =$

4. $8 \div -64 =$

5. $-55 \div 11 =$

6. $-2 \div -48 =$

7. $-18 \div 3 =$

8. $-81 \div 8 =$

9. $63 \div -9 =$

10. $144 \div -12 =$

11. $-5 \div 25 =$

12. $-21 \div -3 =$

13. $-18 \div 4 =$

14. $-17 \div 2 =$

15. $120 \div -5 =$

Division of Integers

Reminder: In division of fractions, the fraction on the left takes on multiplicative inverse which makes the division sign to change to multiplication.

For example: $\frac{2}{5} \div \frac{2}{5} = \frac{2}{5} \times \frac{5}{2}$

Answers

1. -9
2. -9
3. -4
4. $\frac{1}{-8}$
5. -5
6. $\frac{1}{24}$
7. -6
8. $-10\frac{1}{8}$
9. -7
10. -12
11. $-\frac{1}{5}$
12. 7
13. $-4\frac{1}{2}$
14. $-8\frac{1}{2}$
15. -24
